

COVID-19 Breast Imaging Precautions

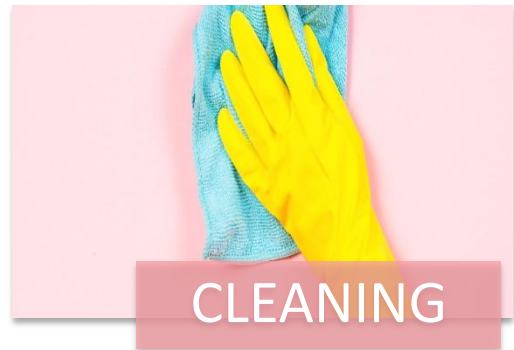

Regular hand sanitizing by patients and staff.

Patients in waiting areas at least 2m apart and may be asked to come to appointments alone.

Level 1 surgical masks for staff and patients in examination rooms and communal areas. Patients may be asked to bring their own cloth masks.

Thorough cleaning of imaging equipment between patients and workstations between users.

Gowns and disposable gloves also required for staff working closely with patients. Visor or goggle protection strongly recommended.
