- Acute & Subspecialty Reporting available – working your local day time, evenings, or weekends. Variety of shift options to enjoy your work life balance.
- 24/7 staffed radiology support.
- FRANZCR Radiologist only need apply.
- AHPRA Registration required.
- Onsite locums available in Australia and New Zealand

IDXt has an opportunity for tele-reporting Radiologists to join for home tele-reporting to cover Australian & New Zealand day, afterhours, weekends, or nighthawk reporting cases in general, acute to subspecialised reporting.

Are you based in time zones aligned to **Canada or UK? Other time zones and locations considered.**

Jump onboard to start enjoying your work/life balance by reporting with IDXt for hospitals & patients **now!**

Offering flexibility that suits you, we have several varied shifts from 1 to 8 hours; **day shifts, early mornings, late evenings, or weekends**, allowing you to have the days to yourself and earn additional income without leaving the comfort of your own home. Complete workstations and hardware are provided. Locum opportunities also available in a number of our Australian and New Zealand based clinics.

Let us know about your availability to report! Short term or ongoing contracts available

Who is IDXt?

IDXt (Integral Diagnostics Tele-reporting) provides tele-radiology services to over 90+ clinics, servicing over 50+ **public hospitals, private medical facilities, and community centres** and a means to access the skills of 220+ IDX radiologists.

Drawing on the expertise of radiologists across Australia and New Zealand plus worldwide; IDXt strives to be a leading provider of quality diagnostic imaging services with a focus on delivering the best health outcomes for our patients.

With a mix of hospital and private practice cases, IDX's reporting platform is **designed and built with tele-radiology in mind**. With a **single centralised smart-reporting worklist** with fast download and precaching functionality, it allows radiologists to report across multiple sites, hospitals, and RIS/PACS providers all from the one application.

Our reporting worklist is supported by real-time AI that identifies and triages critical findings, as well as being supported by an accurate **VR reporting system with CAPD functionality** to ensure that your reporting quality is achieved without unnecessary delays.

Australian and New Zealand based radiologists welcomed to apply. You will need current APHRA (Australian registration) holding a FRANZCR accreditation.
