

Victoria Radiology Consulting

Our group of 29 radiologists provide imaging interpretation and interventional radiology services in the city of Victoria, British Columbia.

We provide care in a variety of settings including both community and tertiary care hospitals, a regional cancer center and a network of privately owned community based radiology clinics to a catchment of approximately 800,000 patients through our partner organizations in Island Health, BC Cancer, and West Coast Medical Imaging.

We are anticipating significant volume expansions in the coming year to our CT, MRI and PET programs and plans for expansion of our Interventional Radiology Service.

We are seeking recruits with a wide variety of subspecialty expertise to join our collegial group of radiologists in beautiful Victoria British Columbia!
