

NEURORADIOLOGIST

A neuroradiologist with interventional skills is required to join a group of 42 radiologists, six of whom specialize in neuroradiology in an academic hospital. The candidate will be an FRCPC, or equivalent, in Diagnostic Radiology and have a minimum two-year fellowship in diagnostic and/or interventional neuroradiology. The candidate will be proficient in diagnostic neuroimaging, image guided spine procedures and endovascular stroke treatment. A proven academic record is strongly preferred.

The QEII Health Sciences Centre is the largest tertiary care group of teaching hospitals in Atlantic Canada and part of the Nova Scotia Health Authority. It is the only center providing endovascular stroke treatment in Nova Scotia and PEI and the core adult clinical teaching facility for Dalhousie University's Faculty of Medicine. There are active residency programs in Diagnostic Radiology, Neuroradiology and Nuclear Medicine. There is a well-developed research infrastructure with opportunities to promote academic achievement.

Halifax is the growing capital city of Nova Scotia in Canada's Maritime provinces. A culturally vibrant medium sized city, it offers a high quality of living, is a popular tourist destination and home to several universities.

All qualified candidates are encouraged to apply; however, in accordance with Canadian immigration requirements, Canadian citizens and permanent residents of Canada will be given priority. Earliest start date will be September 1, 2024.

Interested individuals should send their curriculum vitae and the names and addresses of three referees to:

Dr. James Clarke
Head, Department of Diagnostic Radiology
Dalhousie University
Central Zone Chief, Department of Diagnostic Imaging
