

[Radiologist Opportunity – Calgary, Alberta](#)

The Opportunity

At Canada Diagnostic Centres (“CDC”), we don’t just provide healthcare—we lead the way in diagnostic imaging, offering compassionate, timely, and high-quality services to patients across Western Canada. Since 1993, we’ve been at the forefront of diagnostic imaging and image-guided procedures, leveraging advanced technology with a strong focus on patient care.

We are seeking a **full-time permanent Radiologist to join our team in Calgary**. This role offers a highly rewarding and well-compensated career in an outpatient clinic setting, with no scheduled weekends, evenings, or on-call requirements. Enjoy the flexibility to define your time commitment and vacation, along with a supportive, positive work environment where Radiologists are valued—not sidelined by hospital or large partnership politics. No buy-in is required, and all new colleagues receive equal compensation for the same work. Join a best-in-class team with top-tier clinics, equipment, and technologists.

Please note: This position is for on-site clinic coverage in Calgary. It is not a teleradiology role, and we have no current remote-support needs.

What You’ll Be Doing

- On-site provision of care at CDC’s Calgary clinic locations.
- Interpret and report on a broad range of imaging studies, including X-ray, ultrasound (general body, MSK, breast, obstetrical, and vascular), mammography (screening and diagnostic), fluoroscopy, and bone mineral densitometry.
- Perform image-guided MSK and basic spine procedures for pain management, using fluoroscopy and ultrasound as applicable.
- Collaborate with a skilled team of technologists, nurses, medical office assistants, Radiologists, Cardiologists, Physiatrists, and Perinatologists to ensure efficient and well-structured workflows.
- Develop strong relationships with referring physicians, building trust and confidence in CDC’s diagnostic and procedural expertise.
- Maintain a patient-centered approach, ensuring compassionate and effective communication to enhance the patient experience.
- For sub-specialty-trained applicants, a limited volume of private MRI may be available.

What We’re Looking For

- Fellow of the Royal College of Physicians and Surgeons of Canada, Diagnostic Radiology, or equivalent.
- College of Physicians and Surgeons of Alberta full licensure eligibility, Diagnostic Radiology.
- Canadian Association of Radiologists mammography accreditation or eligibility.

- CMPA membership.
- Eligible for an Alberta Health billing number and practitioner ID.

What We Offer

- Predictable schedules with no evenings, weekends, or on-call work.
- Flexible vacation and start date to suit your lifestyle.
- Highly competitive, stable compensation based on a fixed percentage of fee-for-service billings, with no overhead costs or buy-in required.
- Opportunities for professional development and continuing medical education.
- A modern, well-equipped environment with best-in-class technology, technologists, and facilities.

About CDC

Embark on a rewarding career with Canada Diagnostic Centres (“CDC”), a trailblazer in diagnostic imaging since 1993 built on an unwavering commitment to exceptional patient care. As the leading provider of diagnostic services and image-guided procedures in Western Canada, we take pride in our 43 radiologist-led community clinic sites strategically positioned across Alberta, Saskatchewan, BC, and Ontario. Join our dynamic team and contribute to our comprehensive suite of services, including Ultrasound, Echocardiography, Nuclear Medicine, Mammography, X-ray, Bone Density, GI Fluoroscopy, MRI, CT, image-guided biopsies, and state-of-the-art pain management procedures.

We are a contracted provider of services to Workers' Compensation Board Alberta and contribute to numerous charitable organizations in the communities we serve.

Please note that only candidates selected for an interview will be contacted. All applicants must have legal authorization to work in Canada.
