

Cancer Care Alberta

Radiologist/Nuclear Medicine Physician in Oncologic Imaging

About the Position

The Cross Cancer Institute, in conjunction with the University of Alberta and Alberta Health Services, is seeking a physician with dual certification in radiology and nuclear medicine to join the current group of 18 imaging physicians.

Strong skills in cross-sectional imaging (CT, MRI, and ultrasound), oncologic imaging, and general radiology are a requirement.

The candidate will report general nuclear medicine studies as well as PET/CT and PET/MR. Potential for joining the therapy team for peptide receptor radioligand therapy (PRRT) for those who are interested. An aptitude for, and additional training in, multimodality image guided biopsies and venous access procedures would be a bonus.

Job Duties

- The position is predominantly clinical but will include academic / teaching / administration components
- Candidates would have an academic appointment within the Faculty of Medicine and Dentistry at the University of Alberta.
- Participate in multidisciplinary rounds / tumor boards to contribute imaging expertise to patient management discussions
- Function as a collaborative member of the oncologic care team, working closely with medical and radiation oncologists, surgeons, pathologists, and other healthcare professionals.
- Provide consultation and guidance on the use of advanced imaging techniques for cancer diagnosis, staging, and treatment monitoring.

Compensation

Compensation will be commensurate with the level of training and experience and will comply with the agreement between Cancer Care Alberta, AHS and the Alberta Medical Association.

About the Community

Edmonton is a vibrant urban centre in the heart of the wilderness, the largest northernmost metropolis, and the capital of Alberta, Canada. Experience what 18 hours of sunlight a day feels like in the summer, or how the first snowfall transforms the river valley in winter. No matter the season, Edmonton is made for exploring! Learn more about Edmonton [here](#).

About Cross Cancer Institute

A pioneering cancer treatment and research facility in Edmonton, Alberta. As a tertiary oncology referral center for Northern Alberta, it provides advanced care for cancer patients. This institute boasts a rich history of both basic and translational research, offering clinical trials and a broad range of services. Learn more about Cross Cancer Institute [here](#).

How Cancer Care Alberta Supports You

- Relocation Support: up to \$10,000 for recruits within North America and up to \$15,000 for recruits outside North America
- AHS Sponsorship Support if required
- Immigration (work permit visa support) if required
- Strategic recruitment Incentive
