

UltraScan Medical Diagnostic Imaging

UltraScan Medical Diagnostic Imaging Clinics is looking for additional Radiologists to join our growing imaging clinic team. We have an immediate need for an **OBSP Certified Breast Imaging Radiologist** to assist with summer vacation coverage. Our flagship site is located in picturesque New Hamburg, Ontario, where our services include walk-in x-ray examinations, mammography (we are part of the OBSP program in Ontario), Bone Mineral Density testing, as well as operating 5 ultrasound rooms. We have recently expanded into beautiful Breslau, Ontario with 2 Ultrasound rooms and in six weeks from now, we expect to open to walk-in x-ray examinations as well, with a goal of having all four services in both sites over the next two years. Our PACS system is Velox Imaging, which is very user friendly and allows for remote reading from anywhere in the world. If you are interested in joining our growing team at UltraScan (either regularly or as a locum), we would love to hear from you!

You can call 519-662-7226 (SCAN) or email hr@ultrascan.ca if you are interested in working with our team. Please ask to speak to Kelly.
