Overview

This webinar is designed to provide radiologists and radiology trainees with an overview of complaints and legal processes involving the Canadian Medical Protective Association (CMPA). Through expert-led discussion, participants will gain insight into the typical experience of a Canadian physician involved in a complaint or legal matter in which CMPA support is engaged. The session will outline the usual trajectory of a complaint or legal claim, from initial notification through resolution, and will review the associated logistical requirements, including documentation and time commitments.
